

Intelligent, Efficient, and Scalable Security for Large Venues

HiveWatch

Event venues, arenas, and stadiums are turning to HiveWatch to increase the impact and efficiency of their existing security systems and programs, while offering a safer environment for patrons and employees. HiveWatch is a security operations management platform that streamlines workflows, allows for the consolidation of disparate programs and systems, and reduces false alarms.

Product Highlights

- **Reduce false alarms up to 90%** allowing operators to reduce fatigue and focus on high-impact security initiatives and real-time alarm response
- **Automate real-time detection** in sensitive areas to deter bad actors from entering/tailgating secure spaces
- **Dispatch officers** via the Guard Mobile App with more context (including video) for more efficient, intelligence, and timely response
- **Guard generated incidents** allow officers to generate security or facility related incidents complete with photos via the Guard Mobile App
- **Guard tours** assure officers are visiting checkpoints, doing their rounds, and performing as expected
- **Identify faulty devices and monitor their health** to reduce the chance of an unrecorded incident
- **Case Management** keeps track of repeated bad actors and shares that information with other local venues

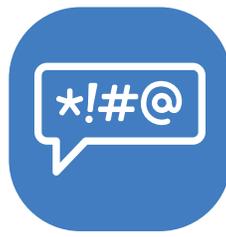

Solve for Common Large Venue Security Concerns
