

Disparate Systems

The Goal

Create a unified security operating environment that enhances visibility and efficiency

The Challenges

- Organizations struggle to manage multiple video/access control platforms
- Difficulty centralizing data and video feeds into a single platform
- Time-consuming video searches across disparate systems

How HiveWatch Helps

The **HiveWatch® GSOC Operating System** consolidates access control, video feeds, and data into a single platform.

Key Benefits:

Centralized Data and Video Management

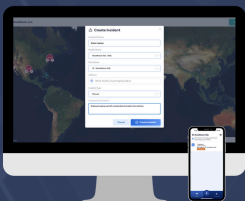

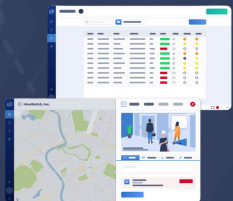

- Brings access control, video feeds, and video data into a single platform
- Allows security teams to view all security information in one place

Streamlined Security Operations

- Reduces context switching for security personnel
- Gives them more focus and reduces burnout/turnover

Improved Efficiency

- Enables security teams to work more productively
- Enhances their ability to detect and respond to threats
