

# HiveWatch® Mobile App

Connect field resources and global security operations center operators with a user-friendly app

HiveWatch

The **HiveWatch® Mobile App** connects your field resources (guards/officers) to your global security operations center (GSOC) with a user-friendly interface, ensuring ease of navigation and interaction for users of all technical backgrounds.

## Features:

- Field resources can receive full context of the event they are responding to.
- Collaborate seamlessly with security operators through voice messages to quickly resolve incidents.
- Guards and field resources can see when new incidents occur near their posts and which guards/officers are addressing them to improve response tactics.
- Set up Guard Tours with checkpoints to guide patrol activity.
- Assess performance to identify high performers, adjust standard operating procedures, and evaluate security program designs.
- Quickly onboard both large and small guard forces.

## Compatibility and availability

The **HiveWatch® Mobile App** is compatible with both iOS and Android devices. The app is available for free download on the respective app stores.

## Security assessment

HiveWatch conducts regular audits and security assessments to identify and mitigate potential vulnerabilities. HiveWatch is committed to continually enhancing the functionality and security of our app through regular updates and improvements to fix bugs and implement new features to ensure an optimal user experience. Each user has a unique authentication login.
